

Smart Service[®]

Scheduling and Dispatching

Smart Service Powerful, Simple Scheduling

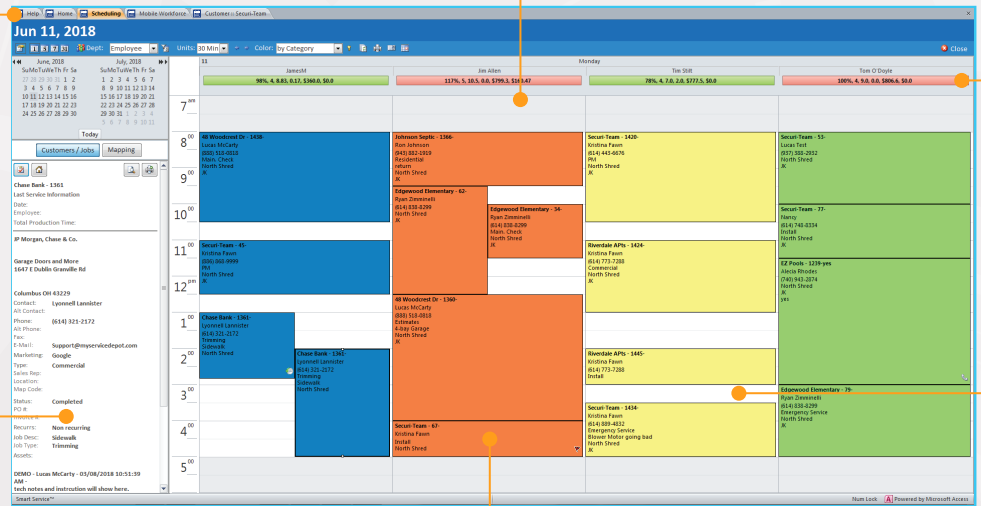

Customizable display eliminates confusion.

Simply drag and drop to add and reschedule jobs.

Quickly determine workload capacity.

View information for the selected job.

Schedule reminders, phone calls, and jobs.

Create new customers or prospects here.

Add scheduling to QuickBooks.

QuickBooks works great for accounting, but as your company grows, you've likely started dreaming about a program that handles scheduling and dispatching with the same elegance. Enter Smart Service! Smart Service is a QuickBooks add-on that empowers you to schedule jobs for your current QuickBooks customers, allowing you to dive in and start using the program right away. The drag and drop scheduler is a cinch to use, and updates occur throughout your office network in real time. This allows multiple dispatchers to schedule work simultaneously, without the risk of double-booking. Best of all, you can customize the scheduler to suit the specialized needs of your business.

Cut down on costly mistakes.

When you schedule and dispatch with paper and pen, you plant the seeds for a business nightmare. Paper work orders can get lost or come back covered in illegible chickenscratch. Remove the guesswork and dispatch jobs in a clearly legible, easy to understand fashion. With Smart Service, you can quickly see all of your technicians' schedules and the expected income generation associated with each job. Adding line items or assets to each task is quick and painless. We've incorporated twenty years of customer feedback to ensure that Smart Service addresses every scheduling and dispatching need facing the modern service company. Simply put, this software does it all!

Get more from your payroll dollars

with Smart Service scheduling software.

Consolidate to reduce waste.

Stop entering job and customer data into separate billing and scheduling systems. Keep everything in one place with Smart Service and your office staff will become twice as effective.

Go mobile to erase paper costs.

Paper work orders belong in the history books alongside the horse and buggy. Eliminate paper costs by dispatching jobs to your techs' mobile devices with our handy work order app.

Finish more jobs every day.

Use Smart Service to streamline job preparation, reduce filing times, and increase work order legibility and you'll squeeze more jobs (and revenue) out of every day!

Embrace the future. Go paperless.

Ready to take your business to the next level? Go paperless with the Smart Service mobile app and your company will rocket to the stratosphere. The Smart Service mobile app puts your workers' schedules on their mobile devices, allowing you to dispatch jobs immediately. From the field, employees can use the app to view service histories and equipment information. They'll also gain the power to update work orders, collect signatures, and digitally file paperwork, moments after finishing the work itself. Meanwhile, office staff can view employee progress in real time. Managers can even keep an eye on the GPS locations of their workforce! This awesome app serves as an indispensable tool for today's service businesses.

Smart Service

From sales to service,
we've got it covered!
