10. Added Last Service Date to the fields available under Marketing Campaigns. (Enhancement #10163)
11. Made improvements to the SSMover utility. (Enhancement #10167)

Resolved Issues

1. Resolved an issue where the “refund successful” message failed to appear when issuing a refund in certain cases. (Issue #10022)
2. Corrected an issue for QuickBooks Online users where saving changes to a Purchase Order would cause the Class field would be cleared. (Issue #10039)
3. Fixed a timeout error with the SSMover utility. (Issue # 10082)
4. Resolved an issue with notes where adding a timestamp could put the notes over the maximum character limit. (Issue # 10087)
5. Fixed an issue where a custom Work Order document would not generate with the correct invoice number. (Issue #10098)
6. Corrected an issue where Batch Invoices would not be included in a history report when filtering for invoiced jobs. (Issue #10099)
7. Fixed an issue where the Scheduled Hours report field would round up to the next hour instead of showing an exact value. (Issue #10100)
8. Resolved an issue where generating an estimate would not give you a warning if an estimate item had been changed or removed from QuickBooks. (Issue #10103)
9. Fixed an error with Google Calendar Integration that would prevent new events from being added. (Issue #10135)
10. Corrected an issue where the Edit Customer button on the Smart Pane section of the scheduler would not work for reminders. (Issue #10140)
11. Corrected an issue where spaces could be removed when typing a message in the Text Messaging center. (Issue #10145)
12. Fixed an error that could occur with payment receipts if the customer name contains certain special characters. (Issue #10150)
13. Resolved an issue with the Manage Invoices screen where using the Print Selected function would cause the printed invoices to be missing the invoice number. (Issue #10157)
14. Fixed an issue that would allow certain illegal characters in item descriptions under the item list. (Issue #10166)

15. Corrected an issue where equipment could not be added if the user adding the equipment has an apostrophe in their user ID. (Issue #10169)
16. Removed port number from CardConnect API requests to comply changes made by CardConnect. (Issue #10177)
